Evan:

I can see how you guys could charge for your equipment over the extended breaks over the holidays based upon (mobe/demobe) but I would think that you guys would not do that since we are going to allow an extended break unless you guys don't need or want that extended holiday break.

On the rental side of things, I know it will be up to the rental company on how they want to do that but I think it is in our best interest to see what they will allow and try to negotiate that.

Thanks
Gary Moore

I agree with Don that its usually most cost effective with rental equipment to utilize the monthly rates. We can try to negotiate with rental vendors over the extended breaks not to charge however it will be at their discretion if we elect to keep the equipment on site without demobilizing it.

With company owned equipment, its chargeable when it arrives on site until it's no longer needed and demobilized. We can do cost comparisons to see if it's cheaper to leave on site or demobilize during the scheduled breaks.

Good morning, Gary.

Typically, on a project that lasts at least a month, we opt for monthly rates on the equipment we'll have on site. This essentially pays for this occurrence. I would not like to have to bill daily as EPA would pay more for equipment in use if we opt to go this route.

Less than a week probably would require opting for daily rates for that week. I could do the math and see if is less expensive than using monthly rates for the rental equipment. More than a week, such as the Christmas break, I would agree, no rental for this period. You don't pay for ER equipment when not in use.

However, you're the boss. If this is want you want to see, that's what we'll do.

Thanks,

Don

Don:

We need to discuss how to handle the rental/owned equipment costs during the holiday periods. I would like to not be charged for the equipment during the Thanksgiving and Christmas/New Years break. These discussions will need to be made with the rental companies and if you guys are bringing in ER equipment for the project we need to discuss this as well. I would like to get all of this worked out as soon as possible.

Thanks,
